

E-ONE TRADITION

# TYPHOON 50' TELEBOOM

**TYPHOON 50' TELEBOOM IS A TRULY VERSATILE UNIT OFFERING QUICK, SAFE AND EASY OPERATION.**

The Tradition 50' Teleboom is a perfect compliment for communities with townhouses, strip malls, warehouses and rural industry. The innovative combination of a pumper style body with an elevated master stream creates an extremely versatile apparatus. Its mid-ship, 3-section boom is compact, quick to set up and requires very little swing clearance. And with the aerial controls conveniently located next to the pump operator's panel, the 50' Teleboom is easily operated with limited manpower.

With over 24-years of aerial experience and zero structural failures or tipovers, E-ONE continues delivering on our founding principles of innovation and safety. The chassis features the industry's most durable roll cage cab design while the aerial provides a 2.5 to 1 structural safety factor\*\* exceeding NFPA requirements.

Whether it's your first aerial, or complimenting your existing fleet, you owe it to your department to check out all the features the Tradition 50' Teleboom has to offer.

**SINGLE PERSON PUMP AND BOOM OPERATION REDUCES THE NEED FOR ADDITIONAL PERSONNEL.**

**EASY ACCESS PUMPER-STYLE HOSEBED.**

- Typhoon chassis with 3/16" aluminum cab

- 8kw Hydraulic Generator Package
- Electrical Cord Reel
- Federal Cab Mounted Scene Lights

### STANDARD AERIAL FEATURES

- Mid-Mounted 3-Section Aluminum Boom
- 2.5 to 1 Structural Safety Factor\*\*
- 400 lb. Tip Load
- 1000 GPM Waterway
- Rescue Ladder
- Two-Way Intercom

\*\*Based on the Aluminum Association's Aluminum Design Manual, 2000 edition

## WHAT WE STAND FOR

Since our founding in 1974, E-ONE is the brand you've come to trust when lives are in the balance and seconds count. Our success over the past 30 years comes from delivering on the core values instilled by our metallurgist founder Bob Wormser. Wormser instilled the values of listening and safety into everything E-ONE provides. In short, we deliver solutions to your apparatus needs that are among the safest in the industry.

Responding to calls and fighting on the front lines is complex and dangerous work. Nothing brings our team greater pride than hearing your stories of success – how lives and property were saved. Although we can't be with you on the front lines, we share your mission of controlling the scene. From our largest aerial to our

most compact Vehicle Information Control (VIC) system, everything we manufacture is designed to help you gain control.

### DEALER

**NETWORK** The most valuable key to the ongoing success of E-ONE is the superior networks, relationships, and customer service offered by all of the E-ONE dealers across North America.

### EZ-LEASE

Financing your purchase and not sure how you can afford the vehicles for your fleet? E-ONE's parent company, Federal Signal

Corporation can help.

Over the past 20-years, Federal Signal Leasing has financed more than \$1 billion of equipment purchases by municipalities and qualified VFD's. Leasing frees up your cash, allowing you to purchase more equipment, sooner.

The program is easy to understand. There are no hidden fees, points, gimmicks, third parties to manage, loan applications or bank meetings to attend. Most transactions are completed within days.

Why take advantage of EZ-Lease? You lock in today's low rates and don't make payments until after you take possession of the apparatus. Ask your dealer for more information on how Federal Signal Leasing can make life easier for your department.

Federal Signal Leasing – making apparatus purchases become a reality.

WHEN LIVES ARE IN THE BALANCE AND SECONDS COUNT.
