

HP100

HIGH

PERFORMANCE

SideStacker® Model

With enough room to open the doors (12 ft. spread), the pin-free jack system is ready to deploy.

The Exclusive E-ONE under-slung jack system allows easy set-up on hilly terrain.

Able to arrive first on scene with everything necessary for fast action, is the E-ONE HP100.

The HP100's short wheelbase and tandem rear axles make for easy maneuvering in traffic. While the crisscross, under-slung jacks contribute to a low center of gravity, they also deploy in an industry leading time of less than 40 seconds.

Ample storage compartments allow quick access to all gear. With a 500 gallon water tank, this first responder is ready to fight the moment it arrives on scene. As for aerial safety—the HP100 is one of the family of aluminum aerials that has never had a structural failure or tip-over.

The HP100's unique features and innovations make this truck a valuable asset to any department.

- All aluminum aerial construction
- 2.5 to 1 structural safety factor
- Wide ladder sections with high handrails provide safe and secure climbing
- Pin-free, crisscross, under-slung jack system
- Short 230" wheelbase (220" wheelbase on "Truck Company") offers unmatched maneuverability
- SideStacker® body provides hose bed reloading without moving aerial

"THIS [HP100] AERIAL MET ALL OF OUR NEEDS AND NEEDED TO FUNCTION AS AN ENGINE AND AN AERIAL. IT HAS IN ITS SHORT TIME HERE PROVEN ITSELF."

CHIEF R.F. REHFUS, SUGAR CREEK, IN

HP100

- Aluminum ladder will not rust, never needs painting or require rubber rung covers to be replaced. Aluminum remains cool, transferring heat faster than steel. Swirl finish assists in reflecting heat away.
- Pin-free jacks deploy quickly and easily, in less than 40 seconds.
- Sets up in confined areas with crisscross under-slung jack system (12' spread).
- Movable pinned monitor standard on ladder for enhanced rescue capability.
- 2.5 to 1 structural safety factor – never had a structural failure or tip-over.
- Integral torque box chassis, under-slung jacks and an aluminum aerial all result in a low center of gravity and great road handling.
- Tilt table tested–lowest center of gravity for optimum safety.
- Several body configurations available including; SideStacker® hose bed, center hose bed and as a “Truck Company” with no pump or tank.
- 500 gallon tank with 115' of ground ladders.
- Short wheelbase with a 45° steering cramp angle provides exceptional maneuverability.

INVESTING IN FIREFIGHTER SAFETY IS OUR PRIMARY CONCERN. THIS TILT TABLE WAS A \$500,000 ACQUISITION AND CAN LIFT UP TO 150,000 LBS.

WHAT WE STAND FOR

Since our founding in 1974, E-ONE is the brand you've come to trust when lives are in the balance and seconds count. Our success over the past 30 years comes from delivering on the core values instilled by our metallurgist founder Bob Wormser. Wormser instilled the values of listenin and safety into everything E-ONE provides. In short, we deliver solutions to your apparatus needs that are amor the safest in the industry.

Responding to calls and fighting on the front lines is complex and dangerous work. Nothing brings our team greater pride than hearing your stories of success – how lives and property were saved. Although we can't be with you on the front lines, we share your mission of controlling the scene. From our largest aerial to our most compact Vehicle Information

Control (VIC) system, everything we manufacture is designed to help you gain control

DEALER NETWORK The most valuable key to the ongoing success of E-ONE is the superior networks, relationships, and customer service offered by all of the E-ONE dealers across North America.

EZ-LEASE Financing your purchase and not sure how you can afford the vehicles for your fleet?

E-ONE's parent company, Federal Signal Corporation can help.

Over the past 20-years, Federal Signal Leasing has financed more than \$1 billion of equipment purchases by municipalities and qualified VFD's. Leasing frees up your cash, allowing you to purchase more equipment, sooner.

The program is easy to understand. There are no hidden fees, points, gimmicks, third parties to manage, loan applications or bank meetings to attend. Most transactions are completed within days.

Why take advantage of EZ-Lease? You lock in today's low rates and don't make payments until after you take possession of the apparatus. Ask your dealer for more information on how Federal Signal Leasing can make life easier for your department.

Federal Signal Leasing – making apparatus purchases become a reality.
