New Invader 664 Cairns® Fire Helmet Looks the Part, Fits the Budget

Pittsburgh, Pa., August 2004 – The new Invader 664 Cairns® Fire Helmet has the rough, durable matte look that many firefighters like, at a budget-friendly price. This new modern-style Cairns helmet choice from MSA is being introduced at the Fire Rescue International Show in New Orleans on August 13-14, 2004.

Cairns helmets are known for their exclusive high-temperature foam impact cap and higher temperature impact cap liner. Also, this technologically advanced, NFPA-1971-2000-compliant model is outfitted with Cairns' exclusive shell-release system that improves performance and simplifies maintenance.

Constructed from a through-colored, DuraGlas™ composite material that resists cracking and chipping, the Invader 664 Helmet provides full-brim protection, SCBA front headband adjustments, and ultra-high-temperature (TPR) edge trim that will not melt or drip.

All MSA Cairns fire helmets are outfitted with a Nomex chin strap, a flame and heat resistant earlap, eye protection, and a 3-position rear-ratchet height adjustment that ensures a comfortable fit for head sizes between 6-3/8 and 8-3/8. A larger diameter helmet hanger fits easily on larger hooks and racks. Every Cairns helmet is backed by a 5-year shell replacement warranty.

The head protection of choice for firefighters since 1836, Cairns fire helmets incorporate the finest materials and latest design and ergonomic advances. Available in a variety of configurations, these helmets can address nearly any firefighting challenge.

For more information about MSA's Cairns fire helmets and other fire service products, dial 1-877-MSA-FIRE or contact your nearest MSA distributor. The Web site is www.MSAFire.com.
