- 8 built-in selectable flash patterns.
- Synchronize up to 6 lights.
- Variety of mounting options allows for easy installation.
- Available with clear or colored lenses.
- Available in red, blue, amber, and green.

Unlimited Possibilities

The LED 3300 series from Federal Signal is a compact, versatile warning light that offers endless application possibilities.

Each 3300 series module features 36 LEDs to create a burst of light. Internal flashers in each module contain 8 flash patterns. Patterns are selected by simply pressing the micro-switch on the back of each unit.

Synchronization is another feature of these LED lights. Each unit is designed to work as a master unit when shipped. By using the synchronizing wire, patterns may be transferred from the master to up to 5 additional units.

Versatility in installation makes the 3300 series the ideal auxiliary light for almost any application. The watertight seal on each unit allows for external or internal applications. The flush mount features a santoprene gasket that seals and protects the vehicle body. Surface mounts sit only 25.5 mm above the mounting surface and cause minimal alteration to the vehicle body. The surface mount is a specially designed bezel that adapts to the contour of the vehicle for a tight attractive fit. Finally the side mirror mount provides an extra gasket to help seal the unit to the side mirrors of most vehicles. All mount kits are sold in pairs.

Versions of the 3300 Series are available with colored lenses for aesthetic appeal or clear lenses for undercover applications. 3300 Series LED lights are available in red, blue, amber, and green. Plus, Federal Signal offers a 5-year warranty on LED components.

HOW TO ORDER

SELECT MODEL

- 330500-02** (1) 3300 Series LED module, amber (amber lens)
- 330510-02** (1) 3300 Series LED module, amber (clear lens)
