Proprietary extrusions of 6063-T5 with wall thicknesses of 3/16" to 3/8" and 3003-H14 aluminum plates work, 1/8" to 1/4" wall thickness.

## REAR BODY:

- Vertical mast for camera or lights

The E-ONE Custom Mobile Command Center is designed to be the centerpiece of your Homeland Security fleet. These unique command centers are designed to meet the individual needs of each customer.

A typical layout would include a conference area, a galley / bathroom area and a communications section. Features such as satellite connectivity, and video conferencing allow interagency communications. The ability to configure radio, phone and internet connectivity ensures a quick and efficient coordination and deployment of resources.

Popular options for the E-ONE Mobile Command Center include two slide-out rooms, awnings, light towers and electronic component shelves and racks. Available on both a custom and commercial chassis, the E-ONE Mobile Command Center meets first responder's needs without sacrificing safety or quality.

## BODY:

- Officer-side body entry
- Slide-out rooms: 8' long and 30" extension
- Up to 2 slide-out rooms per unit
- Positioned in front, back or rear
- Video monitor compartments
- Lower compartments for storage and diesel generator

## MAJOR OPTIONS:

- Generators: diesel up to 20kW most common, 5kW to 40kW, direct drive, and hydraulic
- Automatic leveling system for body in parked position

## OTHER FEATURES:

- Awnings: electric or manual
- Underbody compartments
- Customized warning light packages
- Scene lights: tripod or truck mounted
