

# BRONTO RLP

Articulating aerial improves access.

Platform with 1210-lb. capacity.

## BRONTO RLP

The E-ONE Bronto RLP is the only aerial that reaches targets conventional platforms cannot.

E-ONE's Bronto RLP is the most versatile aerial on the market. The articulating boom offers unmatched performance and diversity for above- and below-grade accuracy of platform placement.

The aerial platform is centrally stored and does not overhang the front or rear of the apparatus. This innovative design creates an apparatus that is 5' shorter than any aerial in its class. Combined with a short 230" wheelbase, the E-ONE Bronto delivers unmatched maneuverability on tight streets. Additionally, the auto-leveling outrigger system sets up in less than 45 seconds saving precious time on the scene.

Whether it's the 100', 114' or 134' configuration, we invite you to experience the pin-point placement of the E-ONE Bronto RLP.

- 100'/114'/134' articulating platform with 2.5 to 1 structural safety factor
- Platform swivels 45° left and right
- Jib boom swings 170° allowing operation 15' below grade or up and over parapets
- 300-gallon tank
- Short 230" wheel base with 45° cramp angle
- SideStacker® hosebed with capacity of up to 800'-5" LDH (long hosebed)

# BRONTO RLP

Enclosed ground ladder storage.
