WHEN THE BELL SOUNDS, I AM READY.

FIREFIGHTER ATHLETE

OVER 125 YEARS OF INNOVATION

Globe invented turnout gear over 125 years ago. Today we still deliver the most advanced, best-fitting, and longest-lasting protection by listening to our customers, creating breakthrough designs, and applying the engineering skills of the nation's most trusted manufacturer.

Our fourth-generation family owners, our employees, and our dealers all share a passion for building "Athletic Gear for Firefighters" in their choice of styles, materials, and options. And no matter what challenges tomorrow's firefighters face, they can be sure that Globe will continue to be there to protect them.

1887 Globe Manufacturing Company is founded in Lynn, MA. Courtland F.H. Freese buys the company and moves it to Pittsfield, NH, which remains its headquarters to this day.

1918 Globe receives a patent for a waterproof coat using an outer shell, a waterproof barrier, and a thermal lining—the same system still used today by all manufacturers of turnout gear.

1953 Globe is the first to use 3M Scotchlite™ reflective trim to add visibility to its turnout gear.

1966 Globe introduces DuPont NOMEX® inherently flame-resistant fabric.

1975 Globe is a charter member of the National Fire Protection Association, creating the first NFPA 1971 Standard for Protective Clothing for Structural Fire Fighting. Globe becomes the first to comply with this new standard for every turnout sold.

1985 Globe introduces two state-of-the-art performance fabrics: PBI® for outer shells and waterproof, breathable Gore-Tex® fabric for moisture barriers.

1991 Globe brings ergonomic design to turnout gear by launching the revolutionary GX-7™, which rapidly becomes the most popular turnout gear in the fire service.

1993 The fourth generation of the founding Freese family takes over the ownership and management of Globe. Gef (left), Rob (middle), and Don (right).

1994 Globe is the first manufacturer of turnouts to achieve ISO 9001 Certification.

1995 Globe acquires Cairns Protective Clothing.

2000 **2003** **2005** **2006** **2007** **2008** **2009** **2012** **2013** **2014** **2015**

Recognizing that the rescue component of firefighters' jobs continues to grow, Globe introduces Globe LifeLine—the right gear for the job. Globe implements Lean Manufacturing, dramatically improving efficiency and reducing delivery times.

Globe launches G-XTREME®—the world's most advanced turnout gear—designed to move the way the human body moves without restriction.

REACTION® joins the Globe Cairns family, with its patented collar that attaches the liner to the outside of the jacket and adds length and fullness where the body bends.

Globe introduces "Athletic Footwear for Firefighters," with its remarkably flexible, cushioned, and contoured construction, to choruses of "Wow."

Globe launches IH™ Pants—integrating a Class 2 internal seat harness with floating, load-equalizing leg loops into turnout gear.

Globe introduces G-XCEL® and RSX™ turnout gear styles—serious performance and great value.

Another new Globe turnout style—CLASSIX®. Value-priced turnout gear with a nod to the traditional.

G-XTREME® introduces a whole new dimension in fit—SHAPE. Now your gear can really fit your body—without extra bulk and without restriction—so that you can perform your job better.

Globe introduces "Athletic Gear for Firefighters." Because fighting fires is demanding, physical work requiring maximum athletic performance.

Globe introduces CLASSIX® METRO™, designed expressly for Metro departments, with a portion of proceeds to benefit the Terry Farrell Firefighters Fund, and the CLASSIX® SE, with a discount to National Volunteer Fire Council members.

Globe introduces the evolution of Athletic Gear for Firefighters. The new G-XTREME® 3.0 is completely retailored from collar to cuff to provide even less restriction.

A New Dimension in Fit: SHAPE

Available in G-XTREME® 3.0,
G-XTREME® and IH™ READY

ORIGINAL RELAXED SHAPE

MANY FIREFIGHTERS CHOOSE A RELAXED SHAPE FOR MAXIMUM MOBILITY. THAT'S ONE REASON WHY OUR G-XTREME® PANTS ARE SO POPULAR—ADDED LENGTH IN THE KNEE AND THE SEAT AND ADDED FULLNESS IN THE SEAT AND THIGH GIVE IT A LESS-RESTRICTIVE, RELAXED SHAPE.

REGULAR SHAPE

THOSE WHO ARE TRIMMER MAY APPRECIATE THIS NEW, CLOSER-FITTING, REGULAR SHAPE WITH ADDED LENGTH IN THE KNEE AND THE SEAT BUT WITH LESS FULLNESS IN THE SEAT AND THIGH.

ORIGINAL TAPERED SHAPE

AN ATHLETIC, TAPERED SHAPE FITS FIREFIGHTERS WITH A LARGER CHEST AND SHOULDERS WITHOUT ADDING BULK AROUND THE MIDDLE. OUR MOST POPULAR SHAPE.

STRAIGHT SHAPE

THOSE WITH A BROADER BUILD OR WHO PLAN TO WEAR A SEAT HARNESS OR OTHER EQUIPMENT AROUND THEIR WAIST UNDER THE JACKET WILL APPRECIATE THE FULLER, STRAIGHT SHAPE.

PROXIMITY GEAR: EXTREME CONDITIONS REQUIRE EXTREME PROTECTION

G-XTREME®, G-XCEL®, and RSX™ (as well as AFL Pants) are also available to meet the Proximity Fire Fighting requirement of NFPA 1971 for use in environments where high radiant heat loads may be encountered.

These garments utilize a reflective aluminized film for radiant heat resistance laminated to a knit PBI® blend for the outer shell. Globe Proximity gear is available with your choice of moisture barriers and thermal liners, as well as with a wide variety of custom options. And for lightweight and flexible protection for your feet, be sure to check out Globe Proximity boots.

MATERIALS

NFPA-certified turnout gear consists of three layers of materials, together called a composite, which is made up of an outer shell, a moisture barrier, and a thermal liner. This three-layer system was originally invented and patented by the founder of Globe over 100 years ago. Technology, design, and protection have obviously changed dramatically since those early days, but the original concept of making turnout gear from these three layers still provides the foundation of current turnout gear. OVER 125 YEARS OF INNOVATION

Globe invented turnout gear over 125 years ago. Today we still deliver the most advanced, best-fitting, and longest-lasting protection by listening to our customers, creating breakthrough designs, and applying the engineering skills of the nation's most trusted manufacturer.

Our fourth-generation family owners, our employees, and our dealers all share a passion for building "Athletic Gear for Firefighters" in their choice of styles, materials, and options. And no matter what challenges tomorrow's firefighters face, they can be sure that Globe will continue to be there to protect them.

1887 Globe Manufacturing Company is founded in Lynn, MA. Courtland F.H. Freese buys the company and moves it to Pittsfield, NH, which remains its headquarters to this day.

1918 Globe receives a patent for a waterproof coat using an outer shell, a waterproof barrier, and a thermal lining—the same system still used today by all manufacturers of turnout gear.

1953 Globe is the first to use 3M Scotchlite™ reflective trim to add visibility to its turnout gear.

1966 Globe introduces DuPont NOMEX® inherently flame-resistant fabric.

1975 Globe is a charter member of the National Fire Protection Association, creating the first NFPA 1971 Standard for Protective Clothing for Structural Fire Fighting. Globe becomes the first to comply with this new standard for every turnout sold.

1985 Globe introduces two state-of-the-art performance fabrics: PBI® for outer shells and waterproof, breathable Gore-Tex® fabric for moisture barriers.

1991 Globe brings ergonomic design to turnout gear by launching the revolutionary GX-7™, which rapidly becomes the most popular turnout gear in the fire service.

1993 The fourth generation of the founding Freese family takes over the ownership and management of Globe. Gef (left), Rob (middle), and Don (right).

1994 Globe is the first manufacturer of turnouts to achieve ISO 9001 Certification.

1995 Globe acquires Cairns Protective Clothing.

Recognizing that the rescue component of firefighters' jobs continues to grow, Globe introduces Globe LifeLine—the right gear for the job. Globe implements Lean Manufacturing, dramatically improving efficiency and reducing delivery times.

Globe launches G-XTREME®—the world's most advanced turnout gear—designed to move the way the human body moves without restriction.

REACTION® joins the Globe Cairns family, with its patented collar that attaches the liner to the outside of the jacket and adds length and fullness where the body bends.

Globe introduces "Athletic Footwear for Firefighters," with its remarkably flexible, cushioned, and contoured construction, to choruses of "Wow."

Globe launches IH™ Pants—integrating a Class 2 internal seat harness with floating, load-equalizing leg loops into turnout gear.

Globe introduces G-XCEL® and RSX™ turnout gear styles—serious performance and great value.

Another new Globe turnout style—CLASSIX®. Value-priced turnout gear with a nod to the traditional.

G-XTREME® introduces a whole new dimension in fit—SHAPE. Now your gear can really fit your body—without extra bulk and without restriction—so that you can perform your job better.

Globe introduces "Athletic Gear for Firefighters." Because fighting fires is demanding, physical work requiring maximum athletic performance.

Globe introduces CLASSIX® METRO™, designed expressly for Metro departments, with a portion of proceeds to benefit the Terry Farrell Firefighters Fund, and the CLASSIX® SE, with a discount to National Volunteer Fire Council members.

Globe introduces the evolution of Athletic Gear for Firefighters. The new G-XTREME® 3.0 is completely retailored from collar to cuff to provide even less restriction.

We even changed out all the heavy and conductive steel components to lighter, stronger, and insulating advanced composites. And they fit so securely, you can even run in them.

All Globe boots share the same foundation but have uppers designed to meet your specific needs and the differing requirements of Structural, Proximity, Technical, and CBRN NFPA Standards. Just put your feet in a pair, and you'll say, "Wow!"
